📍 Visakhapatnam, India

📅 2000/07/19

## OBJECTIVE

---

Looking for the opportunity of Front-end developer to enhance my professional skills and to become successful expert in the field of Information Technology by channelizing my technical knowledge and skills to ensure personal and professional growth.

## PROFILE SUMMARY

---

Trained in **ReactJS** for creating web-applications.

- Proficient in frontend technologies like **HTML** and **CSS**.
- Comfortable in designing responsive webpages using **Bootstrap** library.
- Proficient in **Javascript** for designing interactive websites.
- Familiarity with **Typescript**.
- Proficient in using ReactJS **Components** and **Event handling**.
- Good knowledge in using ReactJS **Hooks** like useState, useEffect, useRef, etc...
- Proficient in handling forms using **Formik** library.
- Expert in Routing using **React-routerV6**.
- Adequate knowledge in state management in ReactJS applications using **Redux** and **Redux Toolkit**.

## INTERNSHIP

---

Completed ReactJS internship from Edupoly Solutions Private Limited (January 2023-July 2023).

- Completed daily tasks and assignments related to HTML and CSS.
- Learnt Bootstrap framework for responsive web design.
- Built advanced logic and made interactive websites with javascript.
- Well trained in ReactJS library and also completed several projects.

## SKILLS

---

### Languages:

HTML  
CSS  
Bootstrap  
JavaScript  
TypeScript

### Libraries:

ReactJS  
Formik  
React-router-domV6  
Redux  
Redux-Toolkit

## PROJECTS

---

### 1. Leaves Module in HR Management:

Implemented a module which allows the employees in an organization to apply for leaves on their preferred days. On the other end the manager/HR is able to approve or reject the respective leaves of employees.

- Developed the front-end web application using ReactJS library, Redux, JavaScript, HTML, CSS, Bootstrap.
- Managed Registry and login of employees and manager/HR using JSON server as database.
- Implemented routing using react-router.
- Implemented useEffect lifecycle hook in all the components.
- Fetched the respective leaves of employees using axios from JSON server.
- Managed the state of whole application using redux and redux toolkit.
- Updated the store using dispatch functions.
- Implemented JSX to display the respective leaves of the employee.
- Handled employee leave forms using Formik library.
- Managed form validations using Formik and Yup library.

- Stored the respective leaves in JSON server using HTTP POST request.
- Fetched the leaves of all employees for the manager/HR using GET request in axios.

### **2.Shopping E-commerce Application:**

Implemented a general-purpose ecommerce store where any kind of product can be bought from the comfort of home

- through the Internet.
- Developed the front-end web application by using ReactJS library, Redux, JavaScript, CSS, HTML & Bootstrap.
- Managed form validations using Formik and Yup library.
- Generated responsive design with media queries in CSS.
- Fetched data from server by using axios based Restful APIs.
- Implemented routing using react-router.
- Fetched data from server by using axios.

### **3.Design of Micro-strip patch Antenna:**

- The antenna is simulated using ANSOFT software for better results.
- After the simulation a circularly polarized microstrip patch antenna for wireless applications is designed.
- Fabricated the antenna using MITS Eleven Lab tool(Single step tool changing).
- After the antenna is designed the practical antenna results are observed based on some parameters under CRO.

## **ACADEMIC PROFILE**

---

- Bachelor's Degree in Electronics and Communication Engineering from Maharaj Vijayram Gajapathiraj College Of Engineering(JNTUK) (2018-2022).
- Intermediate in MPC from Narayana Junior College in Visakhapatnam.
- SSC from Bhashyam High school in Visakhapatnam.

## **PERSONAL PROFILE**

---

Name : Umasri.Theeda.
